PRACTICAL LEARNING

COMMEND ACADEMY

The Commend Academy offers a comprehensive range of training courses covering our products, technologies and solutions. Through practical training sessions and interactive workshops, our experienced trainers provide in-depth knowledge and valuable insights based on real-world experience.

Our training portfolio ranges from introductory courses for beginners and more advanced content for experienced users to specialised training on a variety of topics.

Alongside up-to-date technical knowledge, the focus is firmly on practical application and the personal exchange of experience.

CEE GROUP
CENTRAL EASTERN EUROPE

TRAINING

With certified training from the Commend Academy, you can systematically expand your knowledge and further develop your professional skills. Practical course content enables you to deepen your expertise and confidently tackle increasingly complex tasks.

Certificates issued upon successful completion are valid for two years.

BASIC TRAINING

The Basic Training course provides the technical foundations for working with Commend systems. Participants gain an overview of products and technologies and cover topics including server configuration, VirtuoSIS, IoIP Intercom solutions athe Symphony BF Series, networking and troubleshooting. Participants should have basic computer and networking knowledge and bring a laptop running Windows 10 or later, with an Ethernet connection and administrator rights.

Duration: 2 days
Participants: 4-6 people

ADVANCED TRAINING

The Advanced Training course builds on the Basic Training course and provides more in-depth technical knowledge of Commend systems.
The course focuses on the Symphony MX Series, user management, video, multicast and audio settings, as well as comPLC. Troubleshooting is also covered.
Participants require a valid Basic Training certificate and a laptop running Windows 10 or later, with an Ethernet connection and administrator rights.

Duration: 2 days
Participants: 4-6 people

WEBINAR: PRODUCTS & TOPOLOGY

This online webinar provides a concise introduction to the world of Commend. In addition to an overview of the company, its various segments and solutions, participants gain an insight into the product portfolio and the fundamentals of system architecture, functionality, project design, planning and installation. The licensing system and cLibrary are also introduced.

Duration: 2 Hours

INDIVIDUAL TRAINING

Individual Training is tailored specifically to your requirements. Depending on your needs, the course content can be customised to focus on specific segments, projects or solutions. Duration, number of participants and costs are determined according to your individual requirements and agreed upon request.

Duration: on request
Participants: on request
