

windBRUSH®

The wind protection for rough conditions

by Commend

MIC 480
compatible

**Patent
pending**

**Weather
proof**

Best speech intelligibility – even at high wind levels

Microphones are always subject to acoustic problems when exposed to wind or draughts caused, for example, by passing vehicles. Most standard microphone windscreens are made of soft open-cell foam or fur. This type of windscreen breaks up the sound distorting air swirls to eliminate their distorting energy.

Commend products are used mainly in outdoor environments. Typical applications include emergency call stations for motorways, toll stations or railway stations, to name but a few. Conventional materials cannot be used in rough environments like these. This is because the microphone must be able to withstand natural forces such as rain,

frost and dust. Commend has developed a polycarbonate windshield with a special brush shape specifically for rough environments. Freezing over or blockage caused by dust are no longer an issue when using windBRUSH®! When used in combination with MIC 480, the windshield can easily be installed in any outdoor environment to ensure perfect wind protection in all ambient conditions.

Technical Data

Material / Colour:	body material: PVC / grey brush: BTP / black
Temperature range:	-20° C to +50° (-4° F to 122° F)
Mounting:	via MIC 480 Kit or adhesive strip
Measurements:	25 x 13 mm (0.98 x 0.51 in)
Weight incl. package:	ca. 20 g (0.04 lbs)

Extent of supply

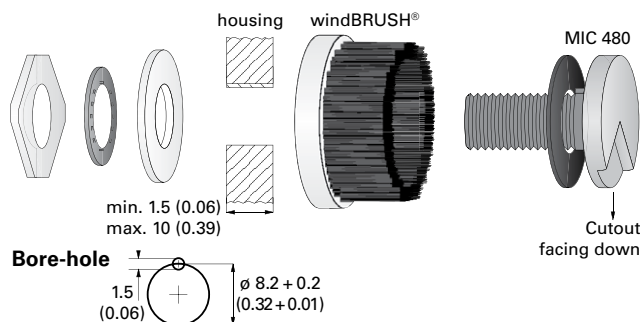

- windBRUSH®
- Adhesive strip
- Short reference

Note

The MIC 480 has to be ordered separately

Mounting via MIC 480

Measurements in mm (inch), not true to scale!

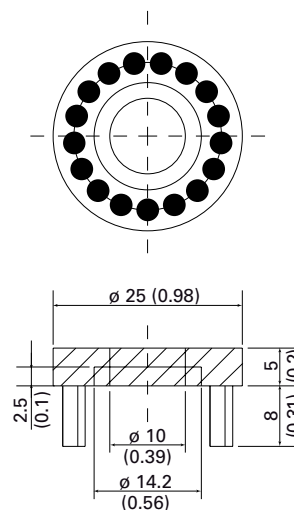

Note

It is also possible to use the windBRUSH® for other microphones. In this case the microphone has to be mounted via the adhesive strip which is included in the extent of supply.

Measurements

Measurements in mm (inch), not true to scale!

Quality tested. Reliable. Smart.

COMMEND products are developed and manufactured by Commend International in Salzburg, Austria.

The development and manufacturing processes are certified in accordance with **EN ISO 9001:2015**.

A strong worldwide network

COMMEND is represented the world over by local Commend Partners and helps to improve security and communication with tailored Intercom solutions.
