Intercom Station Protection

The US-WSSSBB back box is designed to house Commend's tamper/weather resistant substations in either interior or exterior locations. The compact size and robust design provide extremely flexible protection for your investment. The housing is constructed of heavy duty brushed stainless steel. This provides a reliable and attractive housing for the Commend security substation, especially for installation at doors and entryways.

Features and Highlights

- Compatible with Commend WS vandal resistant stations
- Surface mount
- Water resistant
- Durable in wide range of temperature and weather
- Stainless steel
