

SOFTWARE ASSURANCE BY COMMENT

COMPREHENSIVE COVERAGE BENEFITS

Software Assurance by Comment provides a strategic investment in cyber resilience, business continuity, and long-term operational confidence for modern enterprises.

SECURITY PATCHES

Continuous vulnerability updates and protection against emerging threats, ensuring your systems remain secure against the latest attack vectors.

EXPEDITED TECHNICAL SUPPORT

Direct access to expert engineers with faster response times and dedicated assistance when you need it most.

PERFORMANCE ENHANCEMENTS

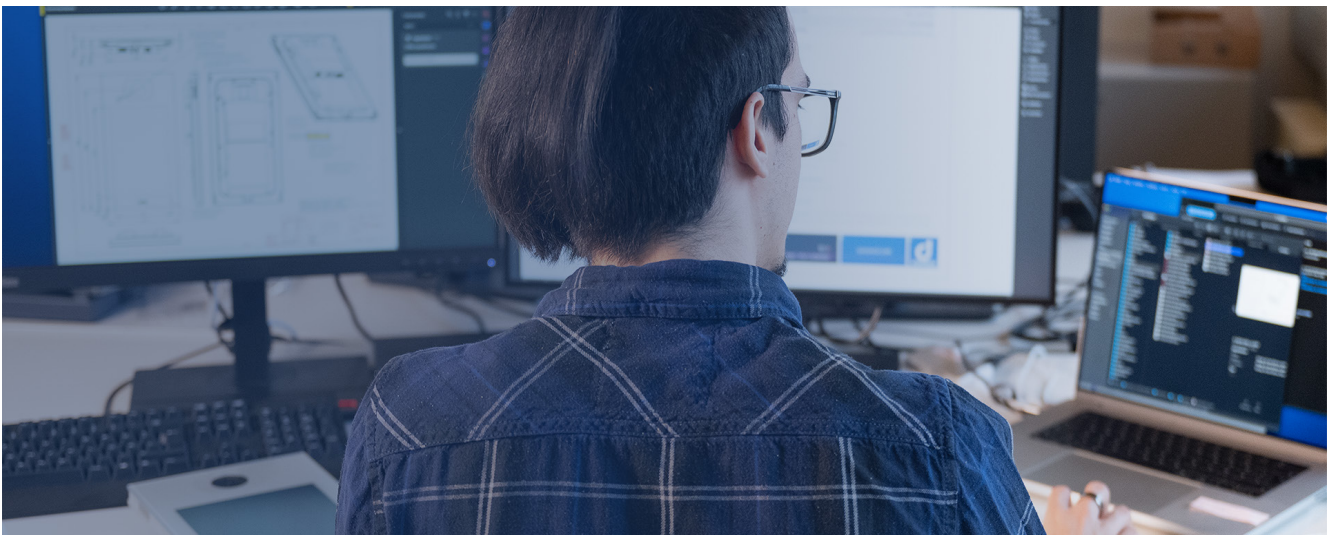

Regular feature improvements and optimization updates that keep your infrastructure running at peak efficiency.

REGULATORY COMPLIANCE

Ongoing alignment with industry standards, data protection requirements, and evolving compliance frameworks.

COMPATIBILITY UPDATES

Seamless integration with evolving operation systems, applications, and third-party technologies.

SOFTWARE ASSURANCE BY COMMEND

SECURE YOUR INFRASTRUCTURE TODAY

Software Assurance keeps your Commend systems current, secure, and fully supported - so your team can focus on operations, not maintenance.

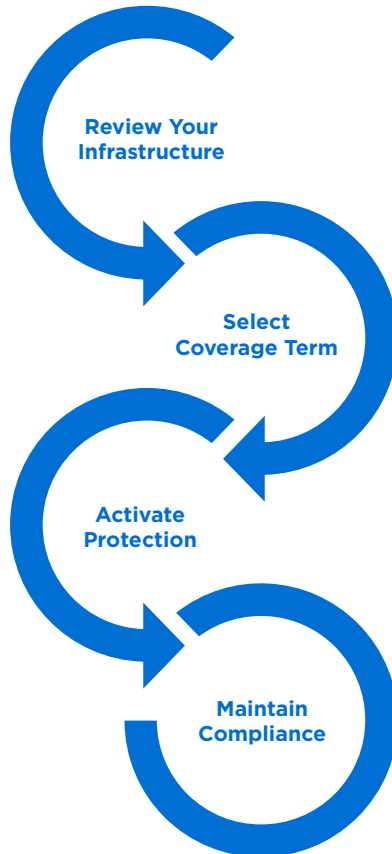

REVIEW YOUR INFRASTRUCTURE

Identify all systems requiring coverage. Assess your current protection gaps, software versions, and any legacy systems that may need to be brought up to date.

ACTIVATE PROTECTION

Immediate coverage begins upon enrollment: including expedited technical support access, security patch delivery, and performance update eligibility from day one.

SELECT COVERAGE TERM

Choose from 1, 3, or 5-year coverage options. Longer commitments deliver maximum value and ensure uninterrupted protection throughout the entire system lifecycle.

MAINTAIN COMPLIANCE

Enjoy ongoing peace of mind. Your Commend systems remain current, compliant, and fully supported - with expert engineers available whenever you need them.

Ready to Protect Your Investment?
Contact our team to include Software Assurance on your next proposal or enroll existing systems today.

PREVENT INCIDENTS. REDUCE DOWNTIME.

Software Assurance isn't optional in today's threat landscape. It's essential infrastructure protection that pays for itself through prevented incidents, reduced downtime, and predictable costs.

Security by Design on all Levels.
